Aluminum Fence Systems

Gates & Hardware

The Morgan Series Aluminum Fence System is manufactured of the highest quality aluminum and all parts of the system are powder coated for durability. The series has a “no screw” assembly process for easier installation. The Morgan Series can be used for residential, pool and commercial properties and is designed to keep its attractive appearance for years. This system is shipped in pre-assembled sections for your convenience.

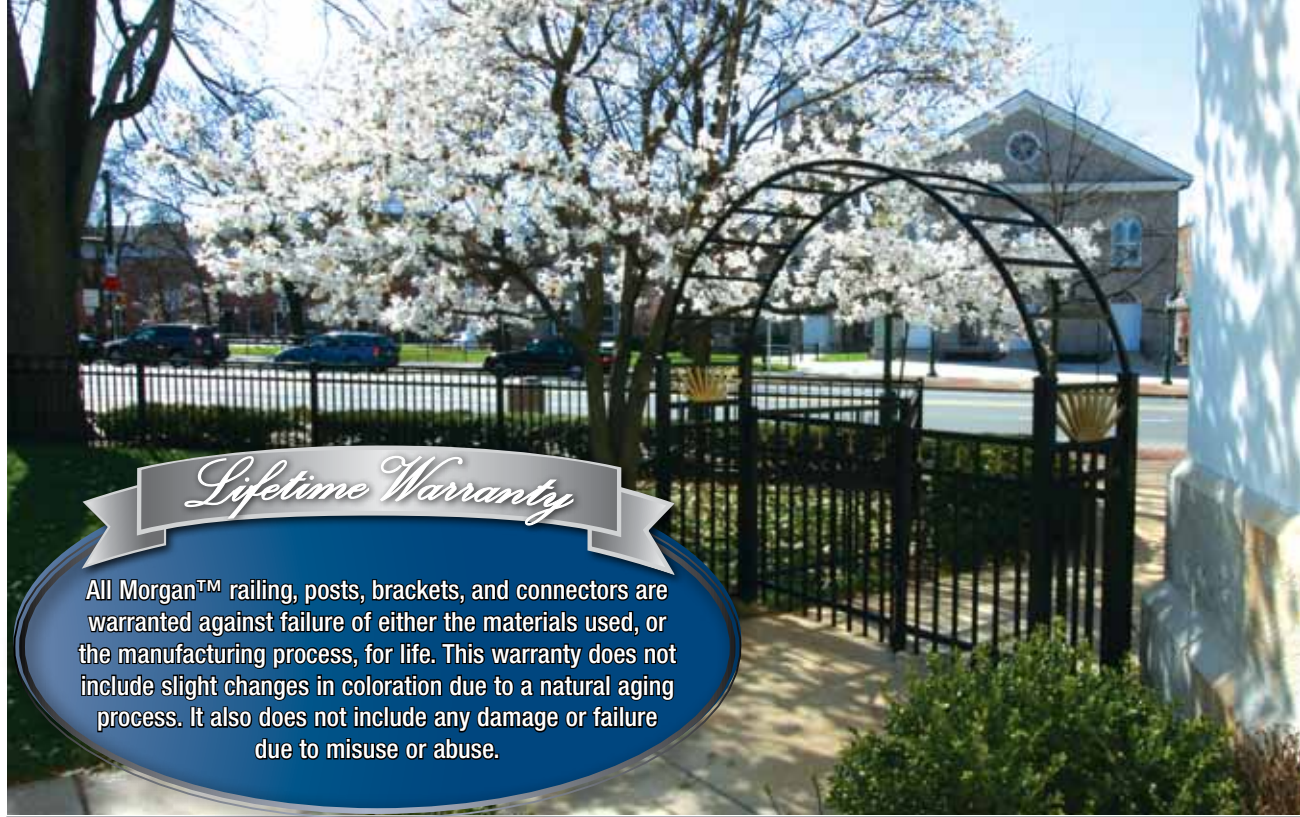

The Morgan Aluminum Fence System consists of two series: 2000 and 4000.

The 2000 Series is recommended for residential installations and is constructed in six foot assembled sections, in various sizes. Hidden picket fasteners (patent pending) produce a clean, smooth profile and gates are available for each style. Optional are three finial choices, short pickets and ring assembly, shown on the following pages.

The 4000 Series is intended for commercial and heavy duty residential installations. Constructed in eight foot assembled sections, the 4000 Series comes in a variety of styles with matching gates. Designed with heavy posts and pickets with hidden fasteners for a clean appearance, every fence installation has a professional look. Special options for the 4000 Series include three finial choices, short pickets and ring assembly.

Arch top gates are available in all styles.

Lifetime Warranty

Lifetime Warranty

All Morgan™ railing, posts, brackets, and connectors are warranted against failure of either the materials used, or the manufacturing process, for life. This warranty does not include slight changes in coloration due to a natural aging process. It also does not include any damage or failure due to misuse or abuse.
